Group name: Cyber-G-LIFE

Group member:
Kyle(Bowen) Guan 218248484
Wennan Zhang 218957340
Minkyu Kim 218647933
Xiyan Lu(vanished)
yuhui(droped the course)

contribution:
Kyle did almost most of the website code and css and js. Wennan did part of the html code with paragraphs. and we used to do an ongoing meeting to change code together, like adjust code or format or style etc.

website introduce:
We use Cyber-G-LIFE as an irony theme that ironically in modern society some people are suffering and no one can see. so we made this website and use ar sense to provide something they should have but not get yet. In a scene those fruits are a symbol of food. and we provide a chat robot that can tell him some code words to get his reply.

phase3 checkpoint
1. QR code submitted for printing - submit through discord.
2. The Group Meeting with me - did the meeting on 04/06.
3. Set of videos and photos documenting the experience and all working components - in *videos and photos document folder* under gh-pages branch.
4. The live website at gh-pages branch AND QR code to custom Group landing page and AR activation - all in gh-pages branch.
5. Instructions, introduction, theme, story etc. as documentation on landing webpage - have those in website.
6. One of the following - custom markers, printed.
7. a clean and organized repo - Yes.
8. GitHub commits of content from *each* group member - only few people working, some people are missing.
9. PDF file of Group Project information - more comprehensive than the website landing page including - everything in this pdf.
10. Also to be evaluated is the final project experience and functionality
